regulation of systemic arterial blood pressure
regulation of systemic arterial blood pressure mediated by a chemical signal
regulation of systemic arterial blood pressure by hormone
vascular process in circulatory system
regulation of systemic arterial blood pressure by renin−angiotensin
BP
extracellular matrix
external encapsulating structure
peptidase inhibitor complex
external side of plasma membrane
nuclear membrane
CC
transmembrane receptor protein tyrosine kinase activity
protein tyrosine kinase activity
metalloendopeptidase activity
metallopeptidase activity
endopeptidase activity
